Back to Board

STI Transmission - \$400 Question

Can STIs be spread through kissing?

No

Back to Board

Condoms - \$100 Question

Where is the best place to store a condom?

Store condoms in a cool dry place

Exposure to air, heat, freezing, friction and light will increase chances of breakage. Do not store them in your wallet or car.

Back to Board

Condoms - \$200 Question

It is alright to have intercourse without a condom if the male doesn't ejaculate because STIs are spread through semen?

False.

Condoms must be applied before any contact between the penis and the mouth, vagina or anus to be effective.

Back to Board
